Profile

Curious and driven web development student with a solid foundation in both frontend and backend technologies. With a professional background in education, I bring strong communication, leadership, and planning skills to every project.

Currently studying Web Programming at Linnaeus University, I specialize in JavaScript, React, Node.js, TypeScript, and Docker.
I am passionate about clean, accessible design, problem-solving, and creating digital tools that make a difference.

Known for being detail-oriented, collaborative, and eager to learn, I'm excited to contribute to impactful and user-focused development teams.

Experience

PRESCHOOL TEACHER, KARLSHAMN MUNICIPALITY — *JANUARY 2017 - PRESENT (ON LEAVE)*

- Leading and planning educational activities for children's development.

- Responsible for curriculum planning based on educational guidelines, digital tools, and documentation.

- Integrated digital tools into the operations and trained colleagues on their use.
